## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 7 is rejected under 35 U.S.C. 102(b) as being anticipated by Ishii (US5851298).

Ishii discloses a plasma processing apparatus in which a wafer (W) is mounted on an upper member (38) of a stage disposed within a vacuum chamber (2), the stage including a cooling jacket (10) with a path (12) for passing coolant liquid (column 5, lines 20-22) and the upper member (6) including a heater (16) and an electrode (14) for an electrostatic chuck (14), a sealed gap between the upper member and the cooling member (column 5, lines 8-40), and a valve (Figure 1, between #48 and helium tank #50). Although Ishii doesn't explicitly disclose a vacuum condition in the gap between the upper and cooling member, it is inherent that the valve would be used to create a vacuum pressure to enhance the cooling effect of the cooling member (column 5, lines 33-41).

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3742

4. Claims 8- 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ishii in view of Hatano et al (US5709757).

Ishii discloses all of the recited subject matter except a mirror surface. Hatano et al discloses a mirror surface (column 6, lines 60-62). It would have been obvious to one of ordinary skill in the art at the time the invention was made to have included the mirror finish of Hatano et al in the apparatus of Ishii because a mirror finish allows radiation heat to be reflected.
